

Creating Layout With Code Solution

Creating Layout With Code Solution

This article will demonstrate via examples how to resolve the Creating Layout With Code Solution error .

```
setContentView(R.layout.activity_main); // using the activity_main.xml file
```

There is not just one way to solve a problem; rather, there are many different ways that can be tried. Creating Layout With Code Solution Further down, we will go over the remaining potential solutions.

@Override

```
public View onCreateView(LayoutInflater inflater, ViewGroup container,
    Bundle savedInstanceState) {
    View rootView = inflater.inflate(R.layout.fragment_main, container, false);
    // Don't forget to attach your view to the layout
    LinearLayout layout = (LinearLayout) rootView.findViewById(R.id.layout);
    // Attach the context
    Button button = new Button(getActivity());
    // Add the layout params
    button.setLayoutParams(new
        LinearLayout.LayoutParams(LinearLayout.LayoutParams.WRAP_CONTENT,
        LinearLayout.LayoutParams.WRAP_CONTENT));
    // Set the text
    button.setText(R.string.click_me);
    // Add the view
    layout.addView(button);
    return rootView;
```

}
